

# MONSTER COLOURS

street games of tombs creatius / painted by Carles Porta

## Tombs Creatius

TOMBS CREATIUS is a company which creates games by Toni Tomàs, craftsman and the project's founder. In 2000 he decided to leave the Companyia de Comediants La Baldufa, which he had founded and where he had worked for 4 years, to begin a new project – TOMBS CREATIUS. So, for over 10 years TOMBS CREATIUS has devised, designed and hand-made outdoor wooden games for all ages.

Wooden games are why this is a warm, natural, reusable, very close to us and allows us to perform design and build of craft and in balance with the environment. And think of streets as play space why they have always been the space for socialization and fun people, and is currently losing this function

## 25 Monster Colors

“COLORES DE MONSTRUO” (MONSTER COLOURS) came about at the beginning of 2008 when we were asked to create a collection of games for Costa Rica’s International Festival of the Arts (FIA). There, we had the great opportunity of the country’s best illustrators bringing our games to life. We were so satisfied with the result that we decided to create a new collection where the utmost importance would be given to the games’ setting.

We can now present this collection. It has been illustrated by Carles Porta, plastic artist, graphic designer and animation producer. The way the collection is illustrated creates a visual, expressive and exciting setting in the streets and public squares. All the games exhibited in this way are at the same time an artistic collection.
